

Kasiphya H. – Detailed View (v1)

By Bill Weis

Requirements:

1. Be able to use a Tobii to control her TV
2. Be able to use a Tobii to control her lamp

Solution – High Level:

1. We provided an Amazon Fire Cube to control the TV
2. We provided an Amazon Smart Plug to control her lamp
3. We designed a custom page for the Tobii Communicator 5 with controls for the lamp and TV

Details of the Solution

1. **Be able to control her TV and Lamp using her Tobii** - Kasiphya has Spinal Muscle Atrophy and she wanted more independence. She communicates using a Tobii Dynavox eye gaze system, so we created a custom page that allows her to control her lamp and TV. We also provided her with an Amazon Fire TV cube to control her TV, a Webcam that is compatible with the Amazon Fire TV cube so she can do Zoom meetings over the TV, and we provided Kasiphya with an Amazon Smart Plug so she can control her lamp.
