

Barbara F. Project – Detailed view (v1)

By Bill Weis

Requirements:

1. Be able to use voice commands to call the nurse

Solution – High Level:

1. We designed a solution which allows Barbara to use voice commands to activate the Nurse call feature

Details of the Solution

1 - Voice Controlled Nurse Call Bell – Barbara was having difficulty working the nurse call button due to complications from MS. We designed a solution that uses an Amazon Smart Plug and a custom control unit as shown in the diagram below.

Here is a Visio diagram of the solution.
